Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 17,19,20 and 22 are rejected Claims 14,15,17,19,20 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable Yoo et al (6,701,059) in view of Morrison (6,591,292) .

Regarding claims 17 ,19,20 and 22, Yoo discloses a bitstream data recording/reproducing apparatus (Figs. 1-3) using a recordable information medium having a data area application packet area and a management area application

Art Unit: 2616

header area (Fig. 2) providing a data for recording broadcasted bitstream information (column 4, lines 29-31 , lines 43-46) , the data stored on said information medium including, a stream object, formed of the broadcasted bitstream information, including at least one data unit includes a plurality of pair of time stamp information and transport packets (application unit) (Fig. 3) , the management information includes a packet length (Fig. 3, column 2, lines 2-40). Further for claims 14 and 19 , Kim discloses a formatter (120, 130) configured to format an input signal into a bitstream of data packets for an MPEG transport stream, said data packets corresponding to the at least one first data unit; and a recorder section (220,230) configured to record the bitstream in the data area of said information medium (fig. 5,6, column 8, lines 10-20)

Further for claim 17 , Yoo further teaches a reproduction section (250) and decoding section (120) reproduces the broadcasted bitstream information from the data area of said information medium ; and a transfer section transfers the data packets in the reproduced broadcasted bitstream information from the reproducer section to a decoder in which a content of the data packets is decoded (column 1, lines 30-40).

Yoo further teaches that the apparatus receives the broadcast streams from a plurality of stations (column 4, lines 29-32) but fails to teach the management information further having information specifying a broadcast source as being recited in claims 17,19,20 and 22.

Art Unit: 2616

Morrison teaches a recording and reproducing apparatus having means for generating and recording the broadcast source information (column 7, lines 60-65, column 8, lines 50-65).

It would have been obvious to one of ordinary skill in the art to modify Yoo with Morrison by providing a generating means as taught by Morrison with the recording apparatus of Yoo for recording the information of the broadcast source as additional management information thereby enhancing the capacity of the apparatus in of Yoo for identifying the recorded streams to be properly process and reproduced when the apparatus records a plurality of the stream programs on the medium.

Response to Arguments

3. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 2616

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
